

Acquisitions for VERSO®

DATASHEET

Efficient Order Management

Auto-Graphics' new and completely redesigned EDI X.12 compliant Acquisitions module provides seamless integration between VERSO's OPAC, cataloging and circulation modules to allow libraries to manage and track all ordering activities in real-time. The module has been designed from the ground-up to provide a significantly more streamlined workflow for library staff and to offer greater fiscal control, security and insight into the ordering process.

- Complete integration with circulation, cataloging, OPAC, Z39.50 targets
- Sophisticated ordering tools: Selection Lists, Branch Distribution allocation
- Real-time fund calculation
- User-configurable order delivery and invoice options

REAL-TIME FUND CALCULATIONS

EDI X.12 Compliant Option

Enables libraries to deliver orders directly to vendors using the EDI X.12 standard. VERSO Acquisitions supports 850 (ordering), 855 (acknowledgment), and 810 (invoice) transactions through a single system to all EDI X.12 compliant vendors including – Baker & Taylor, Ingram, etc.

Branch Profile Distribution Functionality

Provides branch level management; enables libraries to store unlimited numbers of profiles for book purchasing of predetermined quantities. These feed directly to the order at the time of order. Branch Profiling offers the flexibility to edit, override or augment orders at the time of purchase.

Robust Selection Lists Feature

Gives libraries the option to create and use an unlimited number of selection lists with the option to populate manually, from Z39.50 searches, or from MARC uploads. Branch libraries have the ability to individually add new titles on the fly which load directly to the order. In addition, the module automatically interfaces with interlibrary loan and circulation components to seamlessly manage lost and missing items.

Robust Vendor Management Options

Offers real-time access to vendor performance statistics. Provides libraries with the ability to create vendor aliases and subaccounts with linkages to local account numbers.

Detailed Fund Management Capabilities

Delivers libraries real-time access to the library funds. Funds can be assigned as many as five library-configured fund categories to satisfy local reporting needs. Fund management also provides alert thresholds per fund and the ability to better manage funds for the next year with multiple financial year rollover options.
